Professional Summary

Head of Engineering and software engineer with **8+ years** building web products end to end, from database to interface. Most of my work is **Ruby on Rails** and **JavaScript** for **e-commerce**, **healthcare**, **environmental**, **construction** and **accounting** platforms.

I lead a team of 4 engineers on **architecture**, **processes** and **mentoring**, and still ship code backed by **automated tests**. Lately I build **AI agents** for real workflows: agent **harnesses**, **skills**, **RAG**, **PDF data extraction** and **chatbots**.

I have worked in **software factories** and **startups**, and I do my best work in **small multidisciplinary teams** with clear communication.

Work Experience

Head of Engineering — MAWI

Dec 2025 - Present · Senior FullStack Developer since Jul 2024

Mawi is a Costa Rica-based startup that offers a SaaS for budget management in the construction industry. I lead a team of 4 engineers and own the technical direction of the product.

Achievements:

- Leading the engineering team: **architecture**, development **processes** and **mentoring** of 4 engineers.
- Designed and built **AI agents** that automate product workflows, including an agent **harness** for the project and reusable agent **skills**.
- Implemented **RAG** (retrieval-augmented generation) over product data to ground the agents' answers.
- Implemented AI-powered functionalities for process automation (PDF data extraction, embeddings, chatbots).
- Evolutionary development of new features, automated tests in RSpec, bug fixes and performance optimization.

Technologies used:

AI Agents, RAG, Embeddings, Agent Skills, Rails 7, Stimulus, PostgreSQL, GCP, Docker

FullStack Developer — G DIGITAL

Jun 2024 - Jul 2024

G Digital is a multifaceted company that provides marketing and custom software development services mainly in the e-commerce sector.

Achievements:

- Development of complex e-commerce solutions and custom software for businesses in competitive markets.
- Integration with third-party APIs for payment processing, shipping, and inventory management (Bancard, BIMs, etc.).
- Successfully collaborated on critical functionalities for production deployment under tight deadlines.

Technologies used:

RoR 7, Stimulus, GCP, HTML5, CSS3, Javascript, Docker, Bootstrap 5, PostgresSQL, Bancard API

Ssr Backend Developer — Lemu Global Ltd

Jan 2023 - Jan 2024

Lemu is a UK startup that provides conservation services through an app. I contributed to the migration of their backend technological stack, assisted in error correction, and developed new features.

Achievements:

- Successfully migrated the backend stack from CloudFunction to RoR API, increasing system reliability and scalability.
- Increased test coverage from 0 to 65%, significantly improving software quality and stability.
- Integrated multiple third-party APIs (Stripe for payments, OpenWeather for climate data, Firebase for real-time updates).
- Spearheaded the initiative for multi-language support, expanding the platform's global reach.

Technologies used:

RoR 7, Stimulus, GCP, Firestore, HTML5, CSS3, Javascript, Docker, TailwindCSS, PostgresSQL, Stripe, Swagger

Projects

Lead Developer — Millionaires

Oct 2023 - Present

Millionaires is my personal project that seeks to become a personal finance advisor. It is a PWA made from scratch in RoR, hosted on AWS, and receives periodic updates based on user feedback. I am in charge of UX and business logic, database and deployment.

Achievements:

- Integrated OpenAI API to create a personal finance advisor that analyzes user spending patterns and provides AI-powered recommendations
- Implemented advanced Natural Language Processing to understand and respond to complex financial queries
- Developed secure authentication and data encryption system to protect sensitive financial information
- Created dynamic data visualizations to help users understand their financial habits
- Optimized API performance to reduce response times by 40%
- Built as a Progressive Web App, ensuring reliable performance across all devices

Technologies used:

Rails 7, Hotwire, AWS, RDS, S3, EC2, Esbuild, TailwindCSS, PostgreSQL, Caddy, Docker

Skills

Frontend:

React, EmberJS, Stimulus, JavaScript, HTML5, CSS3, SASS, TailwindCSS, jQuery

Backend:

Ruby, Rails, Java, Spring, JavaScript, ExpressJS, PostgreSQL, MySQL, Redis, MongoDB, Firestore, GitHub, GitLab, GitHub Actions

Others:

DevOps, Code Review, Git/Svn, Unit Testing, AWS, GCP, Docker, NewRelic, Jira, Scrum, API, Stripe

Education

MSc in Data Science

Universidad Comunera, Paraguay

In progress

BSc in Software Engineering

Universidad Nacional de Itapúa, Paraguay [GPA 4.1/5.0]

Jul 2011 - Oct 2023

Recipient of an academic scholarship for exchange program.

University of Salamanca, Spain

Sep 2014 - Jul 2015

Recipient of an academic scholarship for exchange program.

Universidade Federal de Sao Carlos, Brazil

Mar 2014 - Jul 2014

Awards

Honor Student

Recognition for Students with high GPA.

Champion in the Mathematics Olympiad

Mar 2009

Languages

Spanish (Native) · **English** (B1) · **Portuguese** (B1)

Interests

CrossFit · Cycling · Cooking
