ABOUT ME

Hello! I am a **software engineer** with more than **8 years of experience** in software development. I have worked in highly competitive sectors such as **e-commerce** and innovative areas like **environmental management**, **healthcare**, **construction project management** and **accounting**.

I am proficient in both **frontend** and **backend development**, and I excel in both areas. I have experience **leading initiatives** from start to finish without supervision. I have implemented **automated testing** systems for quality assurance and have managed **database systems** with complex SQL queries.

More recently, I've been implementing **AI integrations** such as **PDF data extraction**, **embeddings vectors**, **agents**, and **chatbots** to automate processes and enhance user experiences.

I have worked in both **software factories** and **startups**, and I greatly enjoy collaborating in **high-performance teams** and multidisciplinary cells. I believe that **teamwork** and **effective communication** are essential to achieving outstanding results.

WORK EXPERIENCE

Senior FullStack Developer

Jul 2024 - Present

Mawi is a Costa Rica 🇸🇨 based startup that offers a SaaS for budget management in the construction industry.

Achievements:

- Implementation of new AI-powered functionalities for process automation (PDF data extraction, Embeddings, Chatbots, etc.).
- Evolutionary development of new features and continuous product improvements.
- Implementation of automated tests in RSpec to ensure software quality.
- Bug fixes and system performance optimization.
- Research, proposal, and development of new functionalities based on user needs.

SKILLS & TOOLS

Frontend

Backend

FullStack Developer

G DIGITAL

Jun 2024 - Jul 2024

G Digital is a multifaceted company that provides marketing and custom software development services mainly in the e-commerce sector.

Achievements:

- Development of complex e-commerce solutions and custom software for businesses in competitive markets.
- Integration with third-party APIs for payment processing, shipping, and inventory management (Bancard, BIMs, etc.).
- Successfully collaborated on critical functionalities for production deployment under tight deadlines.

Technologies used:

Ssr Backend Developer

Lemu Global Ltd

Jan 2023 - Jan 2024

Lemu is a UK startup provides conservation services through an app. I contributed to the migration of their backend technological stack, assisted in error correction, and developed new features.

Achievements:

- Successfully migrated the backend stack from CloudFunction to RoR API, increasing system reliability and scalability.
- Increased test coverage from 0 to 65%, significantly improving software quality and stability.
- Integrated multiple third-party APIs (Stripe for payments, OpenWeather for climate data, Firebase for real-time updates).
- Spearheaded the initiative for multi-language support, expanding the platform's global reach.
